Nebraska Beekeepers Assoc. Kat Scholl, 2614 W. South St #216, Lincoln, NE 68522

Gary & Ginger Reuter

*University of Minnesota
Entomology department*

Varroa mites are something that every beekeeper must manage. University of Minnesota's Entomology department's "Gary-of-all-trades" will present the signs, symptoms, and treatments of the parasite.

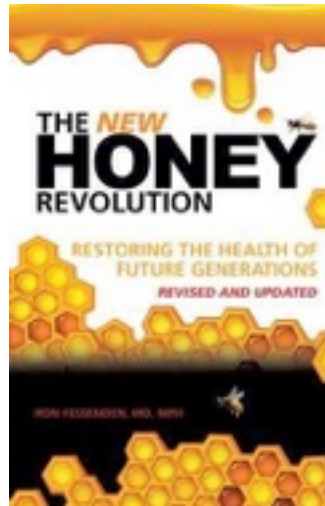

Ginger is a skilled crafter of beeswax candles and will share tips and tricks of beeswax products of the hive.

Dr. Judy Wu-Smart

*Entomology Extension Specialist
University of Nebraska - Lincoln*

A new addition to UNL's own Entomology faculty. Dr. Wu received her doctorate from University of Minnesota Bee Lab under Dr. Marla Spivak. Her research and has done extensive research on sub lethal effects of neonicotinoid insecticides on honey bee and bumble bee queens and colony development.

Dr. Ron Fessenden, MD, MPH

New Honey Revolution author

For almost a decade, Dr. Fessenden has been researching and writing about the health benefits of consuming honey.

The consumption of a small amount of honey each day could reap enormous individual and public health benefits and save billions of dollars each year in health care costs for just pennies a day.

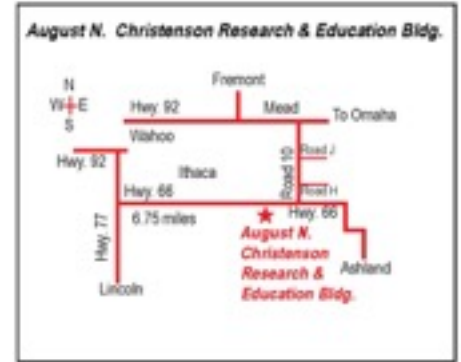

Margaret Berry

Encaustic Painter

As the first artist-in-residence at the Lincoln Cornhusker Marriott Hotel in 2016, Margaret Berry introduced many to the fine art of capturing natural themes in beeswax and resin.

After the presentation about encaustic art, individuals can participate in a "Make & Take" encaustic painting for an additional \$20/person.

Payment is due at the time of the workshop to Margaret Berry. Please indicate on the form if you are interested in attending this additional hands on program.
